This application is before the examiner for consideration.

- I. (1) In view of the complexity and multiple species as broadly and narrowly claimed, (2) too long abstract and (3) improper multiple dependent claims, (4) inventors being overseas, this Office action is made in order for applicants to have one month to response and make correction. No allowance will be indicated until all proper corrections are made.
- II. Claims 7 and 11-14 are improper multiple dependent claims. Accordingly, they are not considered.
- III. The record shows that the instant invention claims are form several priority foreign applications.
- IV. There are four groups of claims (15-18), (19-20), (1-6) and (8-10) with broadest independent claim 15 as the main invention. They are not considered to be patentably different or distinct. Accordingly, no separate consideration or searched will be made. Should applicants show or urge otherwise in the next response to the Office action in order for it to be considered timely, a restriction will be made for the record as shown or urged.
- V. (1) Claims (15-18), (19-20), (1-6) and (8-10) are generic to a plurality of disclosed patentably distinct species comprising many possible salts. Applicant is required under 35

Art Unit: 1752

U.S.C. 121 to elect a single disclosed salt species for an initiation of a search, even though this requirement is traversed.

- (2) Claims (15-18), (19-20), (1-6) and (8-10) are generic to a plurality of disclosed patentably distinct species comprising many possible phosphagens. Applicant is required under 35 U.S.C. 121 to elect a single disclosed phosphagen species for an initiation of a search, even though this requirement is traversed.
- (3) Claims (15-18), (19-20), (1-6) and (8-10) are generic to a plurality of disclosed patentably distinct species comprising many possible aprotic organic solvents. Applicant is required under 35 U.S.C. 121 to elect a single disclosed aprotic organic solvent species for an initiation of a search, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

VI. A telephone call was made to Mr. James A. Oliff and Mr. Thomas J. Pardini on 19 February 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

They are not available.

Art Unit: 1752

VII. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

VIII. Other issues have not been considered until a proper election is made and resolved.

IX. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoa V. Le whose telephone number is 571-272-1332.

The examiner can normally be reached from 6:00 AM to 4:00 PM on Monday though Thursday and about the same time of most Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark F. Huff can be reached on 571-272-1385. The fax phone numbers of the examiner is 571-273-1332. Since there is a newly electronic filing procedure for all initial communicating papers and all responses to an Office action, the examiner fax phone number is not for use to receive any fax in response to an Office action. Applicant is requested and required to send all initial communicating papers and all response to Office action to a central paper or fax receiving center for an electronic scanning procedure.

Applicants may file a paper by (1) fax with a central facsimile receiving number 703-872-9306,

(2) mail with a central mail receiving address:
